

Pivot Support & Tube

We recommend using the Pivot Support. A steel tube can be welded or clamped at the launching areas (rail, i.e.).

Article 1502	Pivot Support	1
Used for a safer handling of the PLT. Fits into the Pivot Tube (Art No 1503).		
Article 1503	Pivot Support Tube	1
Shall be welded at a convenient spot for launching the PLT. Quantity can be changed according to your requirement		

Operations

In rough seas, the Pivot will help personnel to keep balance and focus on aiming.

Picture shows the PLT R 230 projectiles attached to the unit. The distance is minimum 230 meters
