

Ball Projectile

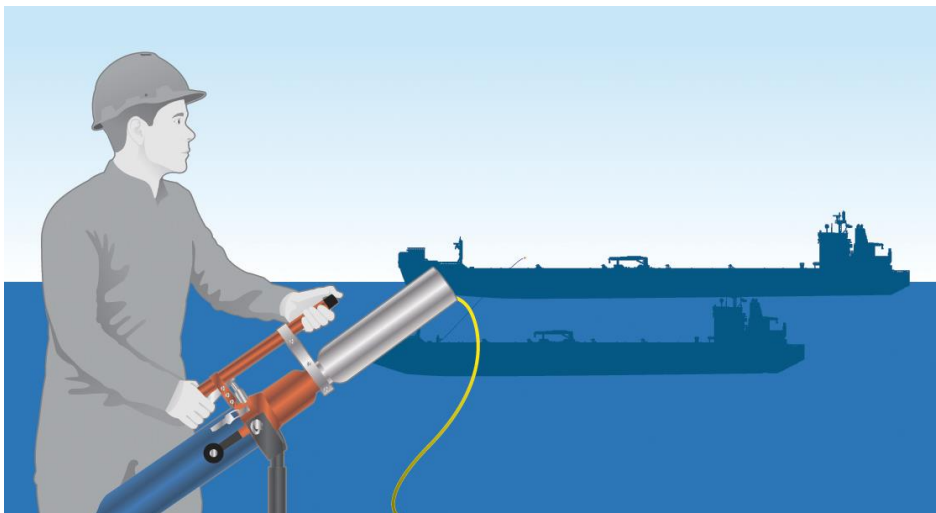

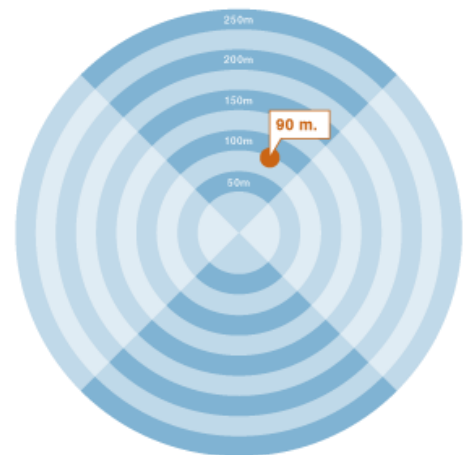

Article 6101 Ball Projectile 1

Ball projectile for PLT 75. Filled with air and coolant preventing bouncing and freezing.

Typical shooting range with a dry and clean line of 5mm (Art No 6109): 90m.

Breaking strength of the line: 350kg

The classic mooring projectile made of rubber that is used with the PLT 75 Launching Tube and often a 5mm line. It is ideal for launching on deck or on land, such as a harbor.

Operations

Many of our users see the advantage for using the Ball projectile in STS operations. It provides increased safety and efficiency.
