

Dacon Rescue Equipment adds new Rescue Baskets to its range

We are pleased to announce that Dacon Rescue Equipment has reached a three-company-cooperation with RLS -Rettungstechnologie GmbH & Lebenshilfe Werkstatt Hildesheim e. V., for the innovative **Rescue Star®** Rescue Basket. Dacon will be responsible for worldwide sales and marketing of the **Rescue Star®**, which will be available directly from Dacon AS in Norway, as well as through Dacon distributors worldwide.

The **Rescue Star®** is a versatile rescue system designed for casualty rescue from the sea. Due to its innovative folding design, the product is easy to deploy and requires little space for storage. With its folded size of only Ø 69cm it facilitates use of rescue basket on almost any vessel with a crane fitted.

With the introduction of the **Rescue Star®**, Dacon now offers a range of Rescue Baskets accommodating from 2-8 persons, depending on model chosen, including **Dacon** Rescue Baskets RB-250 & RB-300 models, already used throughout the world.

A model of the Rescue Star® will be displayed at the upcoming Nor-Shipping event at Lillestrøm 04-07th June.

Any further questions or comments regarding the **Rescue Star®** can be directed to rescue@dacon.no
